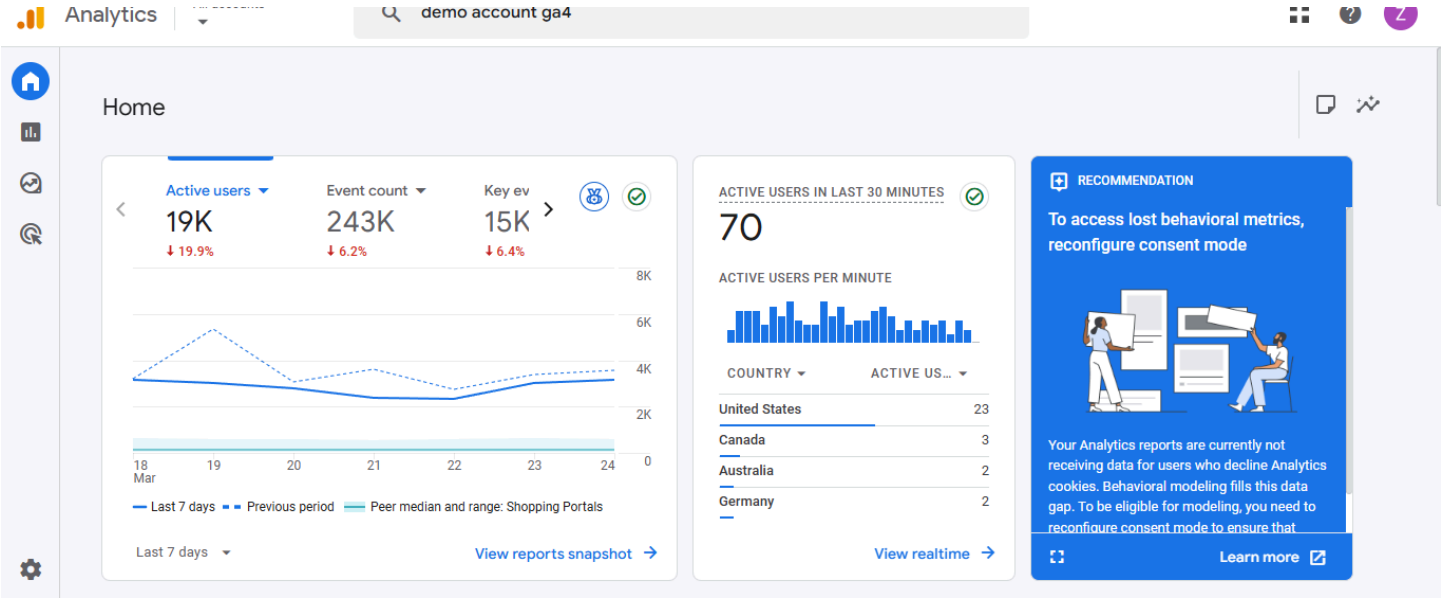
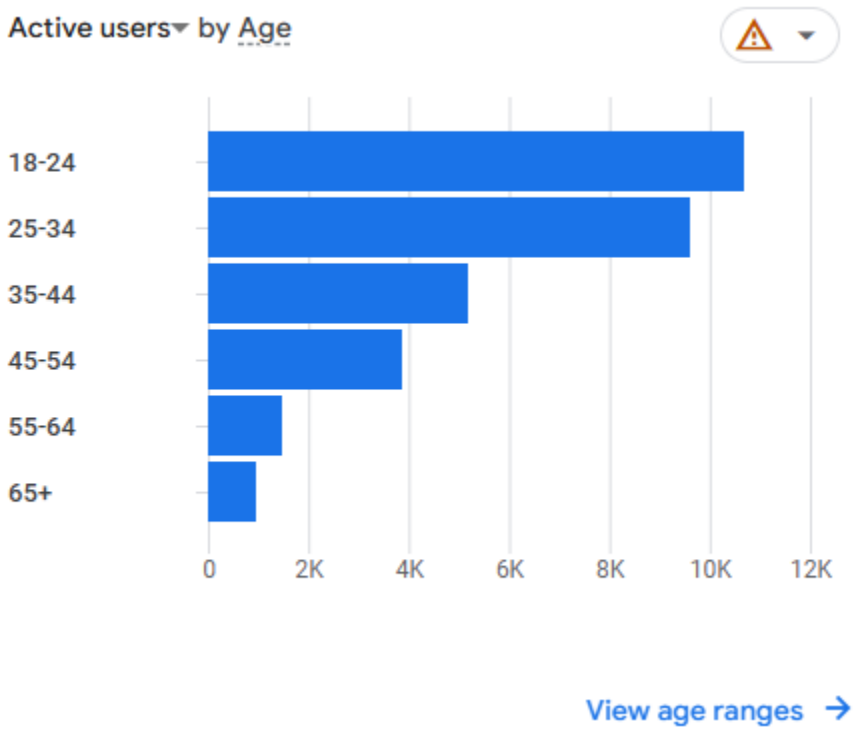
GA4 Analytics Report – Major Project Part 1

Name: Jarif Ahmed

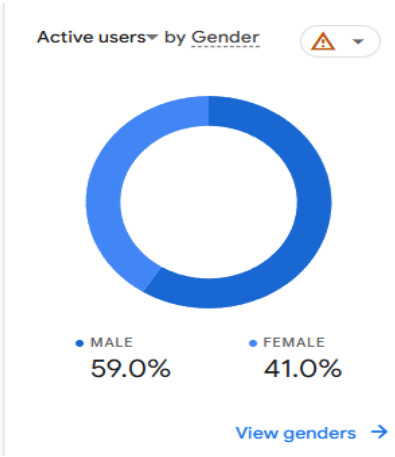
Date: Wednesday, March 25 2026



Demographics and Geo-location

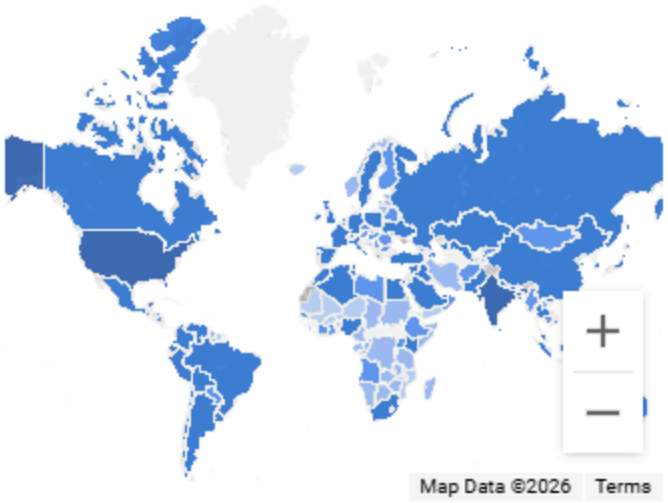


Based on the GA4 Demographics Overview, the audience is primarily made up of younger users. The top three demographic groups are users aged **18–24, 25–34, and 35–44**, with the 18–24 and 25–34 groups contributing the highest number of active users. This shows that younger audiences dominate the website traffic.



In terms of gender, **males represent 59% of users**, while females make up 41%, indicating a slightly male-dominated audience.

Active users by Country



COUNTRY	ACTIVE USERS
United States	59K
India	13K
Canada	4.7K
Japan	2.6K
China	2.2K
Singapore	2.2K
South Korea	1.9K

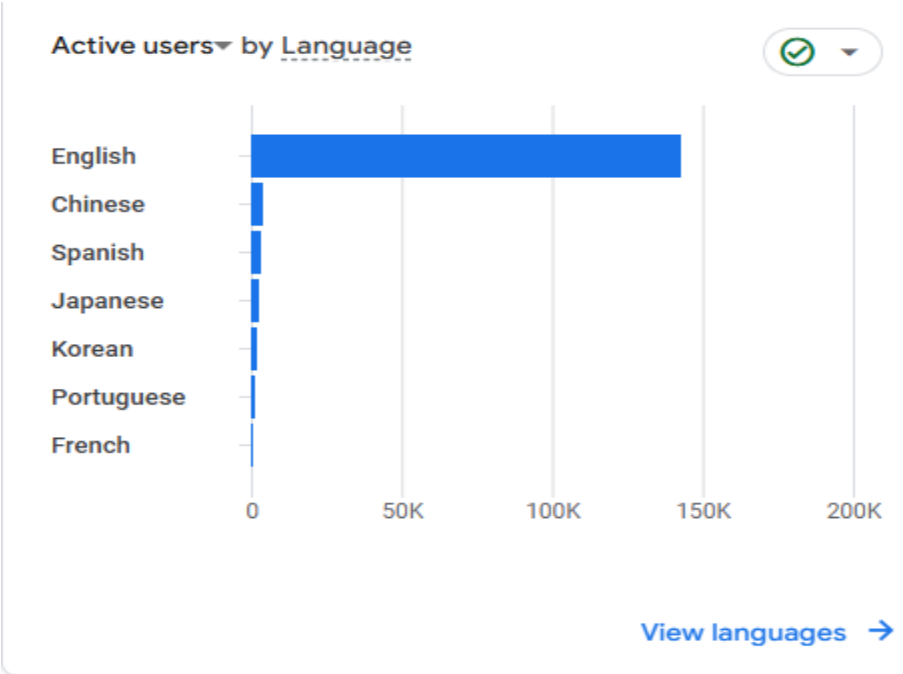
View countries →

Active users by City

CITY	ACTIVE USERS
New York	3.9K
Mountain View	3.7K
Sunnyvale	2.9K
Quinton	2.5K
Houston	2.3K
San Jose	2.2K
San Francisco	2.2K

View cities →

Geographically, the majority of users come from the **United States**, followed by **India and Canada**. At the city level, **New York, Mountain View, and Sunnyvale** generate the highest number of users, making them key locations for traffic and engagement.



Additionally, most users speak **English**, which dominates significantly compared to other languages.

Marketing Recommendations

1. **Social Media Targeting (Ages 18–34):**
   Since younger users dominate traffic, the brand should focus on platforms like Instagram, TikTok, and YouTube to create engaging and visually appealing content. This can increase engagement and drive more conversions from this active audience segment.
2. **Location-Based Campaigns (Top Cities):**
   The business should run targeted promotions or ads in high-performing cities like New York and Mountain View. Personalized offers or localized campaigns can improve user engagement and increase conversion rates in these regions.

Impact on Marketing Effectiveness

Understanding demographic and geographic data allows businesses to create more targeted campaigns. By focusing on high-performing age groups and locations, companies can improve engagement, deliver relevant content, and increase conversion opportunities.

Device and Browser Analysis

Active users by Platform / device category

PLATFORM / DEVICE CATEGORY	ACTIVE USERS
web / mobile	82K
web / desktop	80K
web / tablet	1K
web / smart tv	11
web / (other)	1

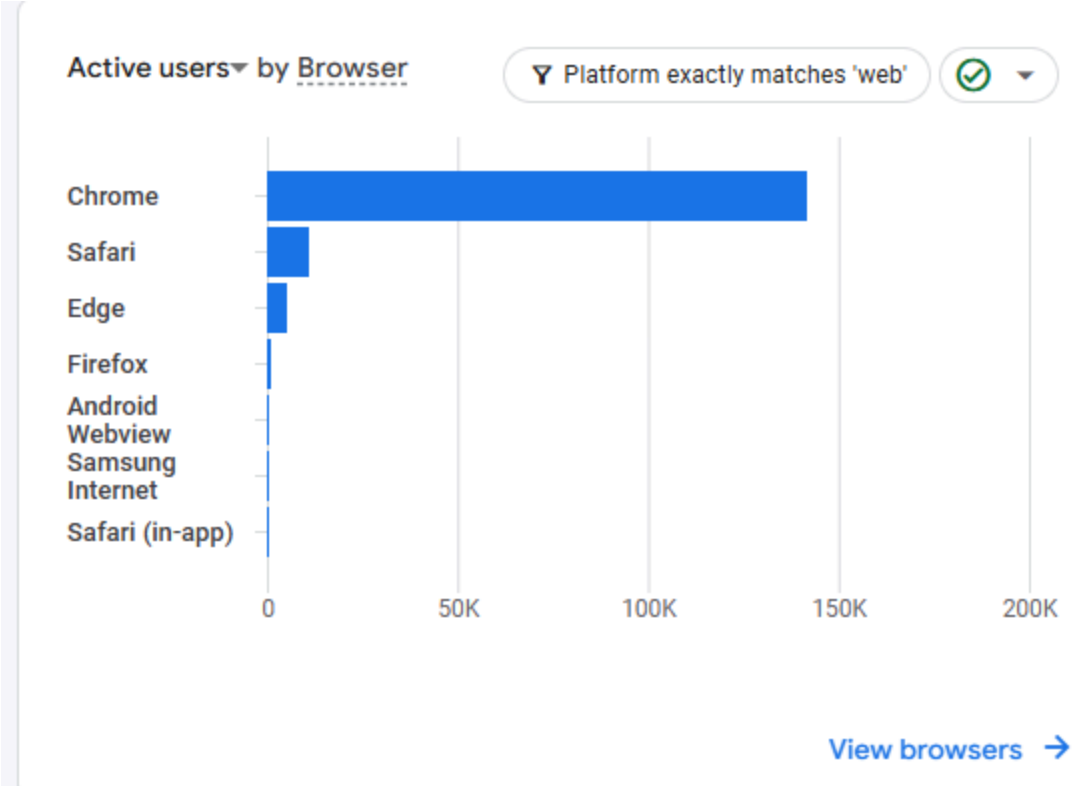
View platform devices

Active users by Device category

MOBILE	DESKTOP	TABLET
50.5%	48.9%	0.6%

View device categories

After analyzing the Technology report in GA4, I observed that the majority of users access the website through **mobile devices**, followed by desktop users, while tablet usage is significantly lower. This indicates that most users prefer browsing on their phones.



In terms of browser usage, **Google Chrome is the most widely used browser**, followed by Safari and other browsers. This suggests that most users are accessing the website through modern and commonly used browsers.

Insights

The high usage of mobile devices highlights the importance of having a **mobile-friendly website**. If the website is not optimized for mobile, users may experience slow loading times or poor navigation, which can lead to higher bounce rates.

Additionally, since Chrome is the dominant browser, it is important to ensure that the website performs well on Chrome while also maintaining compatibility with other browsers.

Recommendation

The website should be fully optimized for **mobile responsiveness**, including faster loading speeds, simple navigation, and clean design. It is also important to perform **cross-browser testing**, especially on Chrome and Safari, to ensure a consistent user experience across all platforms.

Pageviews and Engagement Metrics

Active users by First user source / medium

Apparel | Google Merch Shop	20K	11K	100K	18.6%
Bags | Google Merch Shop	16K	9.8K	58K	18.0%

View pages and screens →

The Pages and Screens report provides insights into how users interact with different pages.

The **homepage** is the top-performing page, with **181K views and 125K active users**, indicating that it attracts the most traffic. Other high-performing pages include **New Google Merch Shop, product pages, and category pages**, which also generate strong engagement.

However, some pages such as **Bags and Apparel pages** have lower views and engagement compared to top pages.

Insights

High-performing pages are likely well-optimized and aligned with user interests, while lower-performing pages may lack engaging content or strong user experience.

Recommendations

1. **Improve low-performing pages** by updating content, adding visuals, and making layouts more engaging to increase user interaction.
2. **Optimize high-performing pages** by adding strong calls-to-action (CTA), such as “Buy Now” or “Shop Now,” to increase conversions.

Conclusion

Overall, GA4 data shows that the website is primarily used by younger audiences, mainly from the United States, and accessed through mobile and desktop devices. By focusing on these key segments and optimizing underperforming areas, businesses can improve engagement, user experience, and overall conversion performance.
