MAJOR ASSIGNMENT PART 2: GA4 EXPLORATION & PRESENTATION

Presented By : Jarif Ahmed

EXECUTIVE SUMMARY

Big Win:

- Desktop + Organic traffic generates the highest revenue
- Indicates strong purchase intent and better conversion on desktop

Leak:

- Over **75–80% of users drop off between Session Start → Product View**
- Users leave before engaging with products

Strategy:

- Improve **mobile user experience** to reduce drop-off and increase conversions

7 (not set)	$0.00	$92.00	$0.00	$0.00	$0.00

INSIGHT & STRATEGIC ANSWER

- Desktop generates the highest revenue across both organic and paid traffic
- Organic desktop users show the strongest conversion behavior
- Mobile generates traffic but significantly lower revenue

Strategic Answer:

Yes, budget should shift more toward **desktop-focused campaigns**, as desktop users convert at a much higher rate than mobile users.

FUNNEL + PATH

Insight:

- Largest drop-off occurs at **Session Start → Product View**
- Most users leave before viewing any products
- From path analysis: Most users go to **Home page first**
- Some users navigate to **YouTube or non-shopping pages**

~~Strategic~~ Action:

Improve the **homepage design and product visibility** to guide users into the shopping journey.

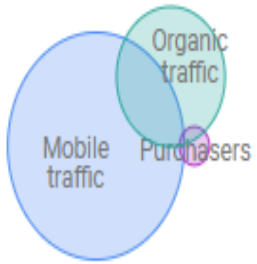
Active users overlap

- Mobile traffic
- Organic traffic
- Purchasers



Segment set		Active users
1	Mobile traffic	84,003
2	Mobile traffic ONLY	72,189
3	Organic traffic	31,796
4	Organic traffic ONLY	18,829
5	Mobile traffic + Organic traffic	12,420
6	Purchasers	2,397
7	Purchasers ONLY	1,974
8	Purchasers + Organic traffic	683

SEGMENT OVERLAP

Insight:

- Only a small portion of users fall into **Mobile + Organic + Purchasers (~600–700 users)**
- Organic users convert more than mobile users

Strategic Action:

- Retarget **mobile + organic users** with personalized offers to move them into the purchaser segment.

COHORT (RETENTION)

Insight:

- Week 1 retention is low (**~2–3%**)
- Retention declines in later weeks

Trend:

- Newer users are returning less frequently

Strategic Action:

- Implement a **win-back email campaign** to improve user retention and repeat visits.

Strengths

- Desktop users generate the **highest revenue and conversions**
- Organic traffic brings **high-intent users ready to purchase**
- Strong performance from **Organic + Desktop combination**

Weaknesses

- Over **75–80% of users drop off** before viewing products
- Mobile users show **low conversion despite high traffic**
- **Low retention rates** (few users return after first visit)

Opportunities

- Improve **mobile UX and checkout process** to increase conversions
- Retarget **organic and mobile users** who haven't purchased yet
- Optimize **homepage layout** to guide users toward products

Threats

- High early drop-off leads to **lost revenue opportunities**
- Inefficient **mobile ad spend with low ROI**
- Users leaving the site to **non-shopping pages (e.g., YouTube)**

NEXT QUARTER ACTION ITEMS

1. Optimize Mobile User Experience

- Improve **mobile site speed, layout, and checkout flow**
- Reduce friction to decrease early drop-off and increase conversions

2. Enhance Homepage & Product Visibility

- Redesign homepage to **highlight products clearly**
- Add stronger **calls-to-action (CTAs)** to guide users into the funnel

3. Launch a Win-Back Email Campaign

- Target users who did not return after their first visit
- Offer **discounts or incentives** to encourage repeat engagement
